SUMMARY

Dedicated and committed B.Tech student in Artificial Intelligence and Machine Learning with a strong foundation in software development and data-driven applications. Experienced in building web-based solutions, implementing backend logic, and working with databases. Skilled in Python, JavaScript, SQL, and web technologies, with hands-on experience through internships and academic projects. Passionate about leveraging technology to solve real-world problems and eager to contribute to innovative development teams.

EDUCATION

Sharnabasva University, B.Tech in Artificial Intelligence and Machine Learning Oct 2022–May 2026
GPA: 9.0/10.0

Coursework: Data Structures Algorithms, Artificial Intelligence, Machine Learning, Database Management Systems, Web Development, Python Programming, Software Engineering.

TECHNOLOGIES

Languages: Python, JavaScript, SQL, HTML, CSS

Technologies: VS Code, PyCharm, Data Processing with Python

PROJECTS

Research Paper Recommendation System:

Developed a recommendation system that suggests relevant research papers to users based on their interests and search history. The system processes academic datasets and applies filtering and ranking techniques to provide accurate recommendations.

Technologies Used: Python, SQL.

Accident Detection Using Portable Airbag for Two-Wheelers:

Designed a safety system that detects road accidents and automatically deploys a portable airbag to reduce rider injuries. The system uses sensor-based detection to identify sudden impact events and triggers a safety mechanism during collisions.

Technologies Used: Sensors, Embedded System Concept, Safety Mechanism Design.

CERTIFICATES AND ACHIEVEMENTS

Certificates:

Python for Everyone — IEEE

Interpersonal Skills — Wadhwani Foundation

Achievements:

Maintained a CGPA of 9.0 / 10 in B.Tech (Artificial Intelligence and Machine Learning).

Completed academic projects focused on recommendation systems and safety technology solutions.
